Deliveroo
London, UK

Subject: Application for Data Analyst Position

Dear Hiring Manager,

I am excited to apply for the Data Analyst position at Deliveroo. With a strong background in data analysis, business intelligence, and visualization, I am eager to contribute to Deliveroo's mission of leveraging data-driven insights to enhance decision-making and product performance.

I hold an MSc in Big Data Science and have hands-on experience in SQL, Tableau, Power BI, and A/B testing to drive actionable insights. In my role at Ernst & Young, I worked on data validation, automation, and dashboard development, improving reporting efficiency and providing valuable insights to product and compliance teams. Additionally, during my internship at Olam Information Services, I developed predictive analytics models and streamlined data pipelines, enhancing data integrity and trend forecasting.

Deliveroo's commitment to innovation and customer-centric solutions aligns with my passion for data storytelling, trend analysis, and stakeholder collaboration. I am eager to apply my skills in data querying, visualization, and problem-solving to support Deliveroo's growth and optimize business strategies.

I would welcome the opportunity to discuss how my experience aligns with your needs. Thank you for your time and consideration—I look forward to the possibility of contributing to Deliveroo's success.

Best regards,
Hemanjali Adini
